

As an Original Equipment Manufacturer, we offer manufacturing, sales and service for extraction systems and cutting technology.

Our products are used for the processing of endless edge cuts, punch frames, empty packages, rework in food processing and cutting of residual materials of any kind, including all self-adhesive materials. In the fields of printing, packaging, food, new materials, textile and many more.

PRECISION PARTS

cutting units

- ...less aerodynamical resistance inside the unit
- ...less weight
- ...single-row adjustment of the stator knives
- ...stainless steel for hygienic areas
- ...standard sizes graduated to DIN pipe diameter
- ...construction and special sizes freely selectable

extraction systems and special solutions

- ...mobile and stationary extraction systems
- ...additional solutions or central extraction
- ...foil bag, container or press operation
- ...fine dust filtering
- ...stainless steel systems
- ...heat recovery
- ...hydraulic compaction plants
- ...oil spray systems for adhesive material
- ...system size and design freely selectable

services

- ...repair of cutting units, fan wheels and knives
- ...spare parts and repair of shredders from all manufacturers
- ...grinding of rotor shafts and stator knives
- ...production of special knives
- ...spare parts such as filters, bearings, knife strips, foil bags
- ...assembly, conversion, expansion work
- ...air measurement and optimization of existing systems
